

HEALTHCARE WORKFORCE ANALYTICS REPORT

Employee Attrition Analysis & Recommendations

Insight into why our people leave — and what we can do about it

Prepared using Python (Pandas)

Prepared for Senior Management | August 2026

Executive Summary

SECTION 01

TOTAL EMPLOYEES

1,676

Headcount in scope

EMPLOYEES LEFT

199

Leavers in period

OVERALL ATTRITION RATE

11.9%

Leavers ÷ headcount

KEY FINDINGS

- ❑ Attrition is concentrated in a **small number of departments and job roles**.
- ❑ Employees working **regular overtime** leave at a **materially higher rate**.
- ❑ **Low job satisfaction** and **poor work-life balance** are consistent leaver traits.
- ❑ Leavers are **typically younger**, earlier in tenure and on **lower monthly income**.
- ❑ **Longer commutes** and **limited recent training** increase the likelihood of exit.

ATTRITION SPLIT

Attrition Across Departments and Employee Groups

SECTION 02

KEY INSIGHTS Attrition is not uniform — it clusters in specific departments and job roles, while gender shows only a marginal difference.

ATTRITION RATE BY DEPARTMENT

ATTRITION RATE BY JOB ROLE

ATTRITION RATE BY GENDER

BUSINESS INTERPRETATION

Retention effort should be targeted at the **highest-attrition departments** and roles rather than applied uniformly across the organisation.

Employee Satisfaction and Wellbeing

SECTION 03

ATTRITION RATE BY OVERTIME

ATTRITION RATE BY JOB SATISFACTION

ATTRITION RATE BY WORK-LIFE BALANCE

KEY INSIGHTS

- ❑ Attrition rises sharply as reported job satisfaction falls.
- ❑ Poor work-life balance ratings are strongly associated with leaving.
- ❑ Employees regularly working overtime leave at a notably higher rate.

BUSINESS INTERPRETATION Wellbeing is a retention lever: **reducing overtime load** and **improving day-to-day working conditions** should reduce avoidable exits.

Career Development and Employee Experience

SECTION 04

ATTRITION RATE BY YEARS AT COMPANY

ATTRITION RATE BY TOTAL WORKING YEARS

ATTRITION RATE BY TRAINING HOURS LAST YEAR

KEY INSIGHTS

- Exit risk is highest in the **earliest years of tenure**.
- Less total career experience** correlates with **higher attrition**.
- Employees with **little recent training** leave more often.

BUSINESS INTERPRETATION Structured early-career support, clear progression paths and consistent access to training are the highest-value development interventions.

Demographics of Employees Most Likely to Leave

SECTION 05

ATTRITION RATE BY INCOME

ATTRITION RATE BY AGE

ATTRITION RATE BY AGE

KEY INSIGHTS

- Attrition is concentrated among younger employees who may still be exploring career opportunities or seeking faster career progression.
- Lower-paid employees appear considerably more likely to leave.
- Longer commuting distances show a slight association with attrition.

BUSINESS INTERPRETATION Younger employees may benefit from clearer career pathways, mentoring programmes and professional development opportunities to improve retention.

Recommendations

SECTION 06

01

Reduce Overtime

Rebalance rotas and monitor sustained overtime in the most affected teams.

02

Improve Employee Wellbeing

Act on satisfaction and work-life balance feedback with visible follow-through.

03

Strengthen Early Career Support

Structured onboarding, mentoring and training in the first years of tenure.

04

Target High-Risk Departments

Focus retention resource on the departments and roles with highest attrition.

DATA

INSIGHT

ACTION

Conclusion

SECTION 07

SUMMARY

- ❑ Attrition is concentrated in identifiable departments, roles and employee groups.
- ❑ Overtime, low satisfaction and poor work-life balance are the strongest drivers.
- ❑ Leavers are typically younger, earlier in tenure, lower paid and commuting further.
- ❑ Targeted, measurable interventions can address the majority of avoidable exits.

FINAL TAKEAWAY

Attrition in our workforce is predictable, concentrated and therefore addressable — acting on overtime, wellbeing and early-career support will protect both our people and continuity of care.
